OBJECTIVE

Seeking a challenging and rewarding opportunity within a software engineering department in order to use and grow my coding skills while learning different coding languages. Talented software engineer specializing in Javascript, node, SQL, and backend services as well as being familiar with React, CSS, HTML and front-end services. Willing and eager to learn new concepts and languages, and seeking to apply my skills at an industry-driving software development company.

RELEVANT EXPERIENCE

FULL-STACK APPRENTICE

Road to Hire | 2022

- *Responsibilities included building a very strong foundation for full-stack applications. Including Javascript, HTML, CSS and the properties of CSS, and React for the front-end.*
- *Also Node, Express, and MySQL for the backend. Other responsibilities included orchestrating project roles and meeting due dates for said projects.*

PYTHON ENGINEERING INTERN

Goodwill | 2021-2022

- *Responsibilities included understanding the full-scope of the Python language as well as teaching students concepts that they were struggling to understand.*
- *Learned how Python is used to interact with data using pandas.*

VOLUNTEERING

PFLUGERVILLE PFISH DAY

Helped young kids ages 6-12 learn how to fish. Other responsibilities included setting up event, helping clean event, and weighing the fish that were caught for prizes.

GOALS ELEVATED FOR SUCCESS

Goals elevated for success is a non-profit organization whose events span multiple charities. I had the opportunity to help with their organizing and filing.
